trying to learn about sockets and I'm currently trying to do a simple application that send a message to a server and read it from the server. I wrote a TCP server (works) and a TCP client (works) and I'm trying to move to UDP and I'm currently stuck with the UDP client. I can send messages to the server (the one with the TCP client), but I cannot read anything from the server (with the UDP client). It seems to be a problem related to blocking, but I can't understand how to solve it.

```
Server: class UDPServer { private readonly
UdpClient _client; private readonly IPEndPoint
_endpoint; public UDPServer(IPEndPoint endpoint, int
port) {
