The Major League Baseball has announced a new initiative to create an online catalog of players and teams available for fan tracking. In addition to the standard stats, full biographies, and history, this online feature will include a “stat tracker”, which will allow fans to monitor the progress of the player of their choosing. The initial launch of the site will feature 15 teams, which will include the Chicago White Sox, Chicago Cubs, Cincinnati Reds, Cleveland Indians, Los Angeles Angels, Los Angeles Dodgers, Milwaukee Brewers, Miami Marlins, Minnesota Twins, New York Mets, Philadelphia Phillies, Pittsburgh Pirates, San Diego Padres, and Tampa Bay Rays. Fan tracking is one of the hottest trends in the sports world. The online network behind the Major League Baseball and the various players and teams has done its homework and plans on expanding the catalog as soon as possible. Take the guesswork out of tracking your favorite players with the MLB Player Tracker. Record and track play-by-play action at all MLB stadiums with the MLB At Bat app for iOS. Take action with the new play-by-play tracking that provides real-time stats, play-by-play of games, and more. Track all of your MLB and college baseball and softball games. Get real-time updates on player stats, lineup moves and transactions, and dynamic stats. See instant visualizations of the game's most important statistics. Play game-winning odds with the MLB Odds Tracker for iOS. Make smarter in-game decisions with the MLB bet tracker. Access actionable, real-time stats. Get on-the-field updates and read-in-progress scores. Be the first to get personalized game previews for in-game events. Automatically download MLB games to watch later. See instant visualizations

This is a great option if you're interested in watching live events, like sports and news. iHeartRadio iHeartRadio is a streaming music service with millions of songs in its catalog. You can pick what type of music you want to listen to, whether it's classical, hip-hop, jazz, R&B, or country. Plus, you can listen to the radio stations

#### What's New in the AudioLabel?

AudioLabel is a tool for creating labels for your CDs. It lets you create labels for your CDs by selecting from various templates while also letting you embed text messages and images. Allows you to select the themes that best suit your needs. Lets you select the themes that best suit your needs. Although it comes packed with many useful features, the GUI is clean and straightforward, and gives users the possibility of choosing from different preset themes which can be used as background images. Plus, you can upload your own photos, provided that the file format is JPEG, BMP, GIF, TIF, PNG, ICO, or EMF. AudioLabel allows users to insert information about the artist, title, year, total time, genre, and the number of tracks, and zoom in or out of the working environment. Enables you to apply all sorts of visual adjustments What's more, you can edit the dimensions of the labels, pick a background color for the front, back or disc labels, undo your last action, as well as cut, copy, paste, or delete the selected objects. AudioLabel features an automatic mode which helps you obtain album information from the Internet (e.g. artist, title, track list). The generated labels can be printed, or exported to PNG, BMP, JPG, or TIF. Should deliver flawless user experience During our testing, we have noticed that the application provides excellent image quality and no errors showed up during our testing. It manages to remain light on the system resources, so it doesn't burden the overall performance of the computer, nor interfere with other programs' functionality. An approachable tool addressing all users alike All things considered, AudioLabel offers an intuitive working environment and useful features for helping you create labels. It is suitable for beginners and experts alike. The name of the game is speed. Along with its stylish interface, quick access to the actions, and lack of annoying ads, AudioLabel can help you create CD labels in mere seconds. What's new AudioLabel is more stable and bug-free AudioLabel fixes the following issues: - The bug where the program doesn't close after a failed save. - The missing option of exporting BMP files. - The bug where the program couldn't recognize the filename if it contained non-ascii characters. - The bugs where the "Dissolve" tool didn't show the image after duplicating it and the "Rasterize" tool didn't show the image after saving. - The bug where the program couldn't add a track list if it contained non-ascii characters. - The bug where, if the "Insert" function was applied to a text and the "Shift" option was enabled, the text would be displayed as a square. - The bug where the duplicate

- 2.40 GHz Processor - OpenGL 2.0 (Windows 7+ only) - Game Difficulty Level - Keyboard/Mouse - 1024 MB RAM Game Features: - Difficulty Levels - You are a pilot of a jet, with an AI. You must use the HUD to keep the jet in air. - Dozens of different levels to play through (some which are ridiculously hard) - Full Reticle and aiming modes for gameplay - 2nd player mode - Facebook and Twitter support
