Post-it Templates & Post-it Notes in Illustrator - Psd to AI is post-it notes software that you can use to create your own post-it notes in Illustrator. It will allow you to create and design stickers with a wide range of shapes and edit them. There are also seven different styles included for you to choose from. Changes that can be made to the stickers that can be made are changing the colors, the text that is included, size, font, shadow, stroke, and more. With this software you can easily create stickers in Illustrator and even edit them with the use of a live guide that is available. The live guide allows you to see what your new shape will look like. Once your stickers are created and saved, you can then export the.ai file to a.png image that can be added to your own website and other applications like this. If you want to know how to use this software in other ways, then you can learn more by watching the video tutorial. Smart Photo Album is a photo organizer and album manager designed to simplify the storage of your photos in a folder structure that allows you to more easily find and manage them.
