Reinforcement Learning (DRL) approaches to solve complex tasks such as navigating the environment by the use of multiple agents simultaneously. This area of research in DRL has gained much attention in the past few years, and there are many approaches that are explored for solving such problems. Among the different approaches, one area that has gained much attention is the multi-agent approach. In this work, we propose a novel method that improves the representation power of a DRL approach by leveraging the intuition of human multi-agent behavior that relies on spatial reasoning. This is achieved by using the Maximum A Posteriori (MAP) estimation that is used in classical Bayesian Filtering theory. The evaluation of the proposed approach is based on the benchmark MuJoCo physics engine, where we were able to achieve up to 80% lower variance and up to 92% lower time per episode compared to the state-of-the-art baselines.

If not, I would have probably uninstalled the ATI driver and installed the NVIDIA driver. It's a well-known fact that the Great Wall of China is the world's largest ancient fortification and that it was built as a defensive and/or ceremonial wall constructed to keep out barbarian hordes from invading. It's also one of China's top tourist destinations, and not just because it's spectacular. The fortification stretches for 4,000 kilometers from north to south, through a remote and mountainous area that's not known for being the most tourist friendly. Which is why more than 3 million tourists visit the structure every year. But, as with most things, what began as a defensive construct has evolved to be one of China's top tourist destinations in its own right. If you're a fan of man-made marvels, or even if you're a bit of a history buff, the Great Wall is a must-see. But you have to do it in the right way to avoid being overcharged or having to wait hours for your turn to cross the wall. 10 things to know about crossing the Great Wall 1. Go during the Chinese New Year While it doesn't officially fall on New Year's Day, you can enjoy the celebrations. The crowds may be higher than usual, but the week-long festival is a time of festivity and family reunions for many, so you'll be among friends. 2. A ticket is not enough You can only get tickets to the wall if you're going on a Chinese tour group. Those are the only tickets that will allow you to cross the wall. 3. You can get to the wall from pretty much anywhere in China Strict rules mean that you can only get to the wall from a designated route. But there 4bc0debe42
